

LEAD PRESENTATION: about 3 minutes

- My name is _____, I live in _____ county and have been a resident of **[State]** for _____ years. I am a volunteer with United Sovereign Americans, not a spokesperson. United Sovereign Americans is a nationwide organization with thousands of active volunteers in over twenty states.
- Today I come to you as a concerned citizen sharing alarming information about our state's voter database uncovered through thousands of hours of research conducted by our highly qualified and credentialed data team. While the numbers are staggering, and somewhat difficult to comprehend, one thing is clear—they don't add up.
- Just like your checkbook must balance, so must our votes. If you had ten thousand fewer dollars in your bank account than you had deposited, you would certainly want to know what happened. And if a company had that significant a discrepancy in its books, the company would most certainly conduct an audit. In fact, yearly audits are required by law for all public companies.
- Our audit of the 2022 election, using only official data provided by state elections officials, shows that the 2022 election may not have been accurate or legally compliant. We are not saying one candidate won over another, or that any election should be overturned. The state's official data from a certified election shows that the votes, as counted, were not all valid and accurate under the law.
- Tonight, we will present you with a Resolution demanding an end to the inaccuracy and uncertainty plaguing our elections, along with a summary of our findings, and the laws that apply.
- We are happy to meet with you to go over this information, including more detail about the specific findings. If you have questions that I cannot answer now, I will commit to getting you the answer in writing from the United Sovereign Americans executive team as soon as possible. This data and our request for an investigation have been shared with state election officials and law enforcement. It's essential that we, the people of **[State]**, make it clear to our representatives that these issues must be taken seriously.
- Today, we come to you, fellow citizens of **[State]**, for support and action. We're asking that you listen to the Resolution, ask questions if you have them, and then vote promptly for its passage. Your action on this Resolution will illustrate your dedication to, and support of, the concerns of your fellow citizens of **[State]**, and citizens across our nation.
- Thank you. Our next three speakers will read the Resolution in three parts and our final speaker will conclude our presentation.

THE PRESENTERS: Time to read the Resolution at normal speed, approximately 9.0 minutes

The number of Presenters is dependent on the time allowed for each person to speak. Presenters read verbatim the Resolution template without interjecting opinion or any commentary.

Presentation of Resolution

THE CLOSER: about 2.5 minutes

- My name is _____, I live in _____ county and have been a resident of **[State]** for _____ years. I am also a volunteer and not an official spokesperson with United Sovereign Americans.
- You just heard a powerfully written Resolution outlining massive inaccuracies in our 2022 election, from registration through certification. In it, you heard us ask for meaningful remedies that will proactively protect the validity of the 2024 General Election for all Americans. In fact, the Resolution cited many U.S. Supreme Court precedents that support the need for such actions. Laws are being ignored.
- Bottom line—The checkbook is not balancing, and we need certainty. The voting system which controls our most vitally important right, the right to choose our representatives, is not producing an accurate, trustworthy result. Do you think that these anomalies within our election system, a system which is part of our national security infrastructure, should continue to be ignored? How much is it costing us **NOT** to fix the problem? How much is it costing our GDP, our military, our foreign policy, our health, the self-esteem of our children and young people, and how much is it costing our dignity to keep fighting each other? The cost is immeasurable, so I urge you to show your agreement by passing the Resolution.
- Our website showcasing our initiatives nationwide has some extremely informative videos that explain the anomalies and apparent violations of law that are found here in **[State]**, as well as in other States. The website is unite4freedom.com. That's UNITE – the NUMBER FOUR – FREEDOM dot com. I encourage you to check it out and learn more about our organization. One more time: That's UNITE – the NUMBER FOUR – FREEDOM dot com. Thank you very much for your time tonight.

THE SWEEP: about 1.75 minute

- My name is _____, I live in _____ county and have been a resident of **[State]** for _____ years. I am also a volunteer and not an official spokesperson with United Sovereign Americans.
- What you heard tonight is the culmination of thousands of hours of work by our highly qualified and credentialed volunteer data teams from data teams from **[State]** and across the country. Let's step back for a second and look at the big picture. Large numbers of Americans, including many right here in **[State]**, have questions about the trustworthiness of our elections. I think we can all agree that we wish this was not the case, but official data shows these concerns are valid, and the law says resolving them is essential in securing our liberty.
- At the same time, government representatives at all levels are not being transparent or responsive to what our citizen audits have found. Our right to choose our representatives in legally valid and transparent elections is the foundation upon which our constitutional republic was established. That right has been bravely protected over the past two and a half centuries by the sacrifices of our brothers, fathers, mothers and sisters. You, as part of this group present tonight, have a chance to show everyone who defended American liberty, and your fellow citizens of **[State]**, that you value it also by passing this Resolution demanding a valid General Election in 2024.
- We appreciate your time and attention.
